The Logo Summer Institute is an intensive immersion in creative computing for K12 teachers, parents, and technology integrators. Our project-based approach supports computational thinking and STEAM learning and teaching. The workshop is highly individualized to accommodate novices as well as more experienced participants, teachers of different subjects, and those who work in informal settings as well as in classrooms.

June 11-14 Austin, TX / June 18-21 Houston, TX / July 9-12 New York City
