GOOD JUST GOT BETTER!

This revision of Linda Rathje's popular workbook improves upon the earlier edition by including a section on the mail merge function, expanded integration activities, a glossary, and *The Computing Teacher's* most current articles examining application software in the classroom. It guides the beginning - and now intermediate - AppleWorks® user through word processing, database and spreadsheet management, and printer options. Each section provides step-by-step instructions and practical applications for educators.

The new AppleWorks for Educators is laser printed and includes a data disk of working examples to guide you through each application as it appears in the workbook.

With the busy workshop season right around the corner, now is the time to call in your order for the 1988-89 version of AppleWorks for Educators - A Beginning and Intermediate Workbook.

ORDER FORM
